

Upgrade **FREE OF CHARGE** to Bullguard's **NEW** Internet Security Version 8.0

1: Download Bullguard 8.0 from the Bullguard website

Or follow this link:

<http://www.bullguard.com/try/bullguard-internet-security.aspx>

Place it somewhere easy to find, like your desktop.

2: Restart your computer

Before proceeding, its very important to restart your computer.

3: Install Bullguard 8.0

Once your computer has restarted, double-click the bullguard.exe file you downloaded in step 2 to start the installation. Simply follow the instructions given during the installation process and register with a username and password.

4: Enter the license key from your previous version of Bullguard

Open the Bullguard user interface by double clicking on the icon on the desktop. Firstly, double click the **Main** icon and then under the **Account** tab, double-click Enter License Key. Enter the 4 part **license key** separated by hyphens.

5: Ensure that the subscription period has been extended

Under the **account** tab double-click **Check status** to update your remaining subscription period. We recommend that you contact our support team as a way of verifying that the term of the license has been extended. This can be done through the interface by double-clicking on the **Support** icon.
